Dear Parents,

Great news! Nursery is now using an online reading system that you can use with your child at home as well as in school. Pearson Bug Club runs alongside our fabulous range of traditional paperback books. Bug Club enables the children to read interactive eBooks both at home and in school. These work on iPads, tablets and PC's. It is great to be able to share these at home. As you read through the stories, there are pictures of little bugs. If you click on the bugs, they ask you questions about the text you are reading. Please encourage and support your child in doing these as you work through the book.

Your child has their own profile, password and specially chosen books to read on-line. These are tracked and I will be able to use the information on line to view the children's reading interests, books and answers to comprehension questions. Your login information will be stuck onto the back cover of your child's Reading Record.

This is a great resource to help support the children with their reading and gives them opportunities to read at home in an interactive way too. This is used throughout the whole school and their login and passwords will stay with them as they move through the school. Please do explore and have fun with this! If you have any questions about this please do ask. If you do not have your login please email the class email and I will email you the login.

Many thanks

Mrs Metcalfe
